Sharing / Emailing URLs for Ebooks and Articles

To share the urls for Ebooks and Articles found in the MSMU Library’s databases, look for the chain link symbol among the tools or details about the resource.

Clicking this symbol generates a “permalink” that combines information about the resource with MSMU Library info so that the resource may be accessed from on and off campus computers.

Examples

ScienceDirect and JStor include the permalink in the doi number below the title on the article/book record.
